

NATO MASTER CATALOG OF REFERENCES FOR LOGISTICS

Quick Guide

Password change, Password reset

NATO Support and Procurement Agency (NSPA)

Content

Thank you for using the NMCRL Web, and by that, supporting NATO and its Allies armed forces.

This guides describes the procedure to reset or change a password; for yourself or for your teammates if you are their master administrator.

A. Forgotten password procedure

B. Change of password for yourself or other (as a Master Administrator)

A. Forgotten Password

2. Click on the link "Forgotten Password"

1. Access to the login screen: <u>NSPA ePortal (nato.int)</u>

Copyright © 2020. NATO Support and Procurement Agency (NSPA). All rights reserved.

This device is public or shared.

Forgotten password?

<u>1?</u> 2

If you encounter any technical issue, please refer to the points of contact available on the <u>ePortal website</u>.

Please note that the generic login "npxxx" cannot be reset.

- 1. Enter your username,
- 2. Enter the security characters,
- 3. Click on Continue.

If your username is correct, then the system will send you an email to the email address registered in NMCRL Web.

	3

You will have a confirmation message and receive a confirmation email.

3. Click on Continue.

Public Apps Subscriber Apps Contact

Public Apps

eProcurement

The NSPA ePortal contains a new eProcurement module which in addition to an improved eBid application also hosts Future Business Opportunities – advanced notification of future large procurement opportunities and the ability to view and bid upon both Notices of Intent (NOIs) and Requests For Proposals (RFPs) for Infrastructure Projects.

Subscriber Apps

AFSC

The AFSC portal is an on-line business content management portal designed to support the Alliance Future Surveillance and Control (AFSC) community. Providing a secure means of sharing information within the AFSC community, the portal hosts a schedule of events and meetings, an electronic library, configuration control processes and technical documentation workspaces.

AGS

The NATO AGS Life-Cycle Support Business Portal (LSBP) is the on-line business content management portal supporting official events and meetings, electronic Materiel Support Services, configuration control processes and technical documentation workspaces all designed to provide a secure means to

Codification

The NATO Codification System (NCS) uses a single 13 digit NATO Stock Number (NSN) to identify an item (or group of functionally interchangeable items) according to its form, fit and function. The NCS enables global identification of materiel and spares allowing quick identification of replacements. This method of cataloguing facilitates equipment interoperability while reducing inventory and simplifying the procurement process.

N@MSIS

The NATO @lectronic Materiel Support Information System (N@MSIS) is the on-line business portal for electronic Materiel Support Services currently supporting the two helicopter weapon systems NH90 and TIGER. It automates to the maximum extent possible the logistics processes agreed upon with the NSPA partners for the spare parts provisioning cycle from price information to electronic invoicing and payment.

NACC

The NATO Air Command and Control (NACC) Web Portal is a web based application providing a community based content management system, including document workspaces and electronic voting processes. It offers fünctions for voting on

2. Scroll down to find the NMCRL application and log in again.

GIOC

The NSPA ePortal includes an application named CEPS Integrated Operations Management System (GIOC), dedicated to fuel transport and transfer requests from civil and military customers of the NATO Central Europe Pipeline System (CEPS). Customers submit their requests in this application and are informed in real time of their status (accepted/modified/refused).

InfoHub

Infolub is a document and information management web application designed to provide a secure means to share information between NSPA and partners. base of a

LANDSYS

Technical Support Applications for MLRS and PzH2000. Controlled access restricted to the participating countries of the ARMS and LCV SPCs.

LPDB

The LPDB provides access to PATRIOT logistics data and contains repair capability information (Acknowledged Repairable Item List – ARL), v System Stock List (WSSL) data and configuration data needed for the PATRIOT Pathership.

M2S2

Wing Mission Monitoring and Scheduling System (M252) is a fully integrated air operations planning, scheduling and management system used by Heavy Airlift Wing (HAW), operating at Pápa Aribase, Hungary, The system is designed to enhance the command and control (C2) capabilities and streamline the workflow of all Wing activities. M252 encompasses the full spectrum of air operations from initial tasking trough mission completion and computational analysis and reporting. It is a state-oth-eart operations centre suite of applications that efficiently manages air mission activity throughout the full mission lifecycle.

NFMS

NSPA Fuel Management System (NFMS) is a web-based application that provides secure access to information related to the management and control of Fuel Distribution in Afghanistan. The NFMS application is available to authorized personnel and to dedicated NSPA personnel. This is a web application used by the LO program.

NLSE

The NATO Logistics Stock Exchange is a fully-secured, web-based application that supports the joint management of materiel among the COMMIT Partnership nations. This joint management is mainly based on visibility of national inventories, redistribution of assets among the partners and consolidated procurrement facilitated by access to Outline Agreements available for immediate online ordering in a modern, electronic, paperless environment.

NMBS

The NATO Mailbox System (NMBS) is the NSPA EDI service used by NSPA and its business partners to integrate and exchange electronic messages in a highly reliable manner. Through different secure communication channels, NMBS acts as hub which icitizates information flow between applications cated at different sites.

NMCRL

NATO Master Catalogue of References for Logistics is an information source with a single point of access to over sources for an analysis of the source avoidance of part duplication by determining if parts avaidance of part duplication by determining if parts aread vexist within your supply chain; identification of sources for parts; obtaining current and accurate wo contact data for suppliers; neuring compliance with full standards, identify items by system type.

SUPDOC

SUPDOC is a document repository for official NSPO documents reserved for NSPO officials (officially designated national representatives to the NSPO Board of Directors and Subsidiary Committees).

B. Password Change

For Master Administrators

As the master administrator, you may update your own password and change the password of your teammates at any time, in the user management app.

For that:

1. Access to the NCS apps home page:

NSPA ePortal (nato.int)

If you cannot see this application, this simply means that you do not have Master Administrator rights. Please contact your Master Administrator or the NMCRL Web helpdesk.

2. Click on the app "User Management"

User Management

The User Management Module allows you to create or update the user within your organization.

UM

- 1. In UM, spot the user that needs its password to be reset and click on the « key » icon.
- 2. Pick a new password for your user.
- 3. Click on Yes.
